Stiefel Electrolyte

Rapid regeneration

With sodium, potassium, and magnesium

Dietetic complementary feed for horses

Stiefel Electrolyte is a supplementary feed to compensate for electrolyte losses. When a horse sweats excessively due to high temperatures or intense exertion, it loses minerals. Stiefel Electrolyte contains many electrolytes (minerals) as well as glucose, which can contribute to rapid recovery during intense exertion. Stiefel Electrolyte is suitable for sport horses, as well as foals and older horses.

Composition

Dextrose; Sodium chloride; Potassium chloride; Magnesium acetate

Additives per kg

Nutritional additives:

Vitamin C of ascorbic acid (3a300) 1,000 mg

Analytical components

Crude ash 51.90%; Crude protein 0.00%; Crude fibre 0.00%; Crude oils and fats 0.00%; Calcium 1.00%; Sodium 13.30%; Magnesium 1.00%; Potassium 6.50%; Chloride 26.60%

Preservative

Acetic acid from calcium acetate (anhydrous and monohydrate) (E263)
26,950 mg

Feeding recommendation

To compensate for electrolyte losses in the event of excessive sweating:

Large horses (600 kg body weight) 50 - 100 g / day

Small horses 30 - 60 g / day

(1 heaped measuring spoon = approx. 20 g)

Recommended feeding duration: 1 – 3 days. Offer water for ad-libitum uptake.

For stabilization of the water and electrolyte balance and when at risk of or experiencing digestive problems (diarrhea).

Storage note

Store the feed in a cool and dry place protected from direct sunlight. Use soon after opening. Store out of reach of children.

Presentation: Powder

Packaging

Art. ST001201 1 kg tin
